

Fessic's Mod List

Here they are. The collection that comprises the latest configuration of my own little Morrowind. You'll probably notice a general trend where tweak mods are positioned higher up in the list, with texture replacers and addons grouped further down.

Highlighted mods are those not recommended to be cleaned with TESTool. Bear in mind that some texture replacers don't actually incorporate an esp file. Conversely, not all of those listed here are conducive to screenshots, which is why you may notice this list and the Morrowind Mod screenshots folder don't precisely coincide.

Masters for ShaalCav0000.ess:
